

Niall Darby

Dublin, County Dublin, Ireland | 0896111810 | nialldarby11@icloud.com | linkedin.com/in/niall-darby-8b8266a9

PROFESSIONAL SUMMARY

Proactive Technical Support Engineer and User Operations Specialist with over 9 years of experience delivering hands-on technical support, infrastructure troubleshooting, and escalated problem-solving in high-growth enterprise environments. Highly proficient in administering core SaaS platforms, identity ecosystems (Okta, Azure AD), and endpoint management. With an active focus on using advanced AI/LLM tools (Cursor, Agentic Workflows) and cutting-edge models (OpenAI GPT-5.x, Codex) alongside scripting (PowerShell, Bash) to automate repetitive tasks, I excel at diagnosing complex issues and scaling IT operations. Known for looking beyond immediate fixes to ask "why did this happen?", actively partnering with engineering and product teams to deploy systemic solutions and elevate the overall customer experience.

TECHNICAL SKILLS

- **AI Models & Ecosystems:** OpenAI (GPT-5.5, GPT-5.4, Codex 5.3/5.2), Anthropic Claude (Opus 4.8), Google Gemini, Multi-Agent Workflows, Prompt Engineering.
- **Scripting & Automation:** PowerShell, Bash, Python (Familiar), Cursor IDE.
- **SaaS & Service Management:** Zendesk, ServiceNow, Slack Admin, Google Workspace, Microsoft 365, Atlassian.
- **Identity & Endpoint Management:** Okta, Active Directory, Azure AD, SSO, MFA; Autopilot/Intune, Workspace ONE, JAMF Pro.
- **Networking & Infrastructure:** DNS, DHCP, VPNs, Core Routing, VDI Environments (VMware Horizon), Encryption (BitLocker/FileVault).
- **Hardware & AV:** macOS, iOS, Windows PC/Laptops, Break/Fix, Video Conferencing, Printer/Peripheral configuration.
- **Frameworks:** ITIL-aligned Incident, Problem, and Change Management, Strict SLA adherence.

PROFESSIONAL EXPERIENCE

Production Engineering & Enterprise IT Support | LinkedIn (via HCLTech)

Jul 2025 – Present | Dublin, Ireland

- Provide frontline desk-side and remote IT support to a global workforce, successfully troubleshooting complex macOS, iOS, and Windows environments, including hardware failures, kernel panics, and encryption recoveries (BitLocker/FileVault).
- Engineer automated solutions using PowerShell and Autopilot/Intune (AAD) to deploy certificates, enforce compliance policies, and provision applications, alongside performing ad-hoc deployment and on-site installation of workstation hardware/software.
- Manage the complete workstation hardware lifecycle, including asset recovery, facilitating warranty repairs with hardware vendors, maintaining break/fix spare parts, and executing hardware upgrades for new hires and existing staff.
- Administer highly secure Identity and Access Management environments (Active Directory, Azure AD, Okta), resolving MFA resets, SSO failures, LDAP issues, and complex security group provisioning.
- Troubleshoot VDI environments (VMware Horizon) and the Microsoft 365 ecosystem, executing end-user data back-ups and restorations, resolving sync errors, and handling complex permission conflicts.
- Support enterprise meeting room environments, video conferencing systems, and peripherals, while acting as a dedicated technical escalation point to answer specialized technical questions from the Sales department.

- Log and manage requests through ServiceNow, ensuring daily ticket updates, strict adherence to SLAs in a highly pressurized environment, and collaborating with engineering teams to resolve urgent global escalations.

Full-Stack Application Developer & Automation Engineer | Independent

Concurrent / Ongoing

- Architected and am currently developing a proprietary SaaS platform from the ground up, leveraging advanced AI/LLM developer tools (Cursor IDE) and agentic workflows to accelerate the software development lifecycle.
- Utilize cutting-edge models (OpenAI GPT-5.5, Codex 5.3, Claude Opus) for complex code generation and automating deployment pipelines, using this SaaS project as a live test-bed to evaluate how AI speeds up support workflows and solves complex programmatic logic.
- Deeply navigate the Apple Developer Program, managing iOS provisioning profiles, app distribution protocols, and certificate management for multi-platform deployment.

Technical Support Level II | Dropbox Sign (Contract)

Sep 2024 – Mar 2025 | Remote, Ireland

- Served as an advanced escalation point for Dropbox's core SaaS suite (Sign/Fax), utilizing Zendesk to manage complex customer environments, API queries, and workspace configurations.
- Partnered directly with core Engineering and Product teams to escalate undocumented edge cases, contributing directly to feature enhancements and the systemic resolution of recurring bugs.
- Managed multiple concurrent SaaS customer opportunities, balancing highly technical troubleshooting with empathetic communication to drive renewals, handle billing negotiations, and ensure long-term platform engagement.
- Applied ITIL-aligned support principles to ensure consistent service quality and rigorous incident tracking.

Technical Account Executive & Support Specialist | Infosys (EE UK)

Jun 2021 – Sep 2024 | Dublin, Ireland

- Supported large-scale telecommunications infrastructure for EE UK, ensuring uninterrupted connectivity and high service availability for enterprise clients.
- Liaised directly with BT engineering teams to address network ingress and operational downtime, translating complex technical fault data into actionable repair strategies.
- Analyzed customer feedback and performance telemetry to identify recurring network issues, proposing targeted workflow improvements that reduced repeat complaints.
- Mentored new hires and shared advanced troubleshooting practices, driving team cohesion and elevating overall technical capability.

Technical Support Executive | Concentrix (BT Broadband Project)

Jan 2017 – Jul 2018 | Dublin, Ireland

- Acted as the crucial first line of defense for network services, utilizing diagnostic tools to identify line faults, performance degradation, and infrastructure disruptions.
- Collaborated with external engineering teams to escalate and resolve complex physical and logical infrastructure challenges, ensuring minimal downtime.
- Owned end-to-end case management, combining technical diagnostics with clear, empathetic customer updates to exceed service SLAs.
